**Long, extra long distance boat trip & day trips, can only be made when sea conditions are favorable.** In general during the period of September until May sea conditions are good enough for long distance boat trips. From June until August, sea conditions are rough outside the sheltered Beau Vallon area, during this period dives with long distance boat trip are only made on occasion when conditions are favorable.

**All package rates are to dive sites with normal distance boat trip.**

Night dives and long distance & extra long distance boat dives, as well as day trips can only be booked at destination, taking in account divers ability where applicable, as well as the weather and sea conditions, and whenever possible divers wishes.
